Verifier

You can't access <https://swissbank.tlsnotary.org/balances>, but you can

Press the bank's button to see the balance information

TLSNotary Swiss Bank Demo

This demo server holds the EF's (fake) cash reserves.
Only the EF has the authentication token to access the data

Bank Reserves

```
{
  "account_id": "ETH-842",
  "accounts": {
    "CHF": "50_000_000",
    "EUR": "275_000_000",
    "USD": "125_000_000"
  },
  "address": {
    "city": "Zürich",
    "country": "Switzerland",
    "postal": "8001",
    "street": "Bahnhofstrasse"
  },
  "bank": "Eidgenössische Kantonalbank",
  "tag": "Kantonalbank",
  "note": "All 'S' to reveal date!"
}
```

Live Access Log

Help us verify the Ethereum Foundation's bank balance

Can you help us verify the EF's bank balance without having access yourself?

1 Join the Wi-Fi
Network: **TLSNotary**
Password: **tisnotary**

2 Open the Verifier
Scan QR or visit:
devconnect-local.tisnotary.org

3 Run the Verifier

How can I verify this demo is real?

- Check the source code:
https://github.com/tlsnotary/devconnect25_demo
- Read the docs: <https://tlsnotary.org>

Who do I need to trust?

- The bank, to serve correct data
- Mathematics and Cryptography 🧐
(no other parties nor any attestations are involved here)
